

USDA Wins Plateau Insight *Customer Excellence Award*

USDA was awarded Best Launch by a Large Organization in this years 4th Annual Customer Excellence Awards. This program honors Plateau customers who are creating outstanding value and meeting business challenges in their organizations through the use of Plateau technology.

This award highlights the accomplishments of AgLearn being recognized industry wide. Months before the Insights users' conference, corporate and Federal Plateau users worldwide were asked to submit their proposals for this award. After reviewing the nominees the list was paired down to four finalists: USDA, BB&T Bank, Emirates Airlines, and Computer Associates. The competition was strong.

“This award is long overdue and I think everyone saw this coming even last year. They have the best communications campaign ever; this year’s winner is USDA for their AgLearn implementation.”

Plateau CEO Paul Sparta
